

DERRICK LUBANGA

Address: Nairobi, Kenya
Phone: +254 743 684 173
Email: lubanga.derrickn@gmail.com
LinkedIn: https://www.linkedin.com/in/lubangaderrick/
Portfolio: https://de-lubanga.onrender.com/

EDUCATION

Master of Science in Data Science and Analytics
Strathmore University

Bachelor of Science in Mathematics and Computer Science
Kenya Methodist University

SKILLS

- Machine Learning
- Predictive Analytics
- Data Engineering
- Statistical Modelling
- Data Architecture
- Pipeline Engineering
- Database Management
- Deep Learning
- Sentiment Analysis
- Data Mining
- Data Governance
- Quality Control
- Anomaly Detection
- Text Mining
- Geospatial Analytics
- Regression Analysis
- Stream Processing
- Cloud Warehousing
- Automated Validation
- Design Thinking
- Data Visualisation
- Business Intelligence
- Dashboard Design
- System Integration
- Web Development
- Content Management
- Technical Documentation
- Infrastructure Maintenance
- Assistive Technology

EXECUTIVE PROFILE

Data scientist with over 5 years of experience delivering machine learning solutions, predictive models, and robust data quality frameworks across healthcare, public sector, and IoT domains. Specialises in designing scalable ETL/ELT pipelines and statistical models that convert complex unstructured data into actionable, evidence-based policy and business decisions. Engineered real-time streaming architectures and forecasting models that improved financial planning accuracy by 15% and cut data anomaly-detection latency to under 5 minutes. Seeking to apply expertise in predictive analytics and data engineering to a Senior Data Scientist role requiring proven success in enterprise machine learning deployment and data governance framework implementation.

WORK EXPERIENCE

Data Scientist | Stahili | Nairobi, Kenya | October 2025 – Present

Key Responsibilities:

- Executed data quality validation and model evaluation tasks remotely across hybrid team workflows using cloud-based development environments and secure VPN tunnels.
- Engineered an AI-driven report synthesis pipeline that automatically generates narrative summaries and embedded visualisations from filtered survey datasets.
- Formulated geospatial mapping layers to track consumer purchasing behaviours across distinct Living Standards Measure categories in East Africa.
- Developed an end-to-end interactive analytics dashboard to visualise survey data across demographic and geographic segments in real time.
- Implemented comprehensive end-to-end QA testing protocols across all dashboard modules to ensure reporting integrity for enterprise decision-makers.

Junior Data Scientist | iLab Africa, Strathmore University | Nairobi, Kenya | July 2025 – October 2025

Key Responsibilities:

- Constructed predictive statistical models and validation frameworks to forecast poultry population for the Kenya Livestock Masterplan, improving dataset consistency across 5 regional sources by 25%.
- Architected automated data pipelines for IMARIKA LoRaWAN sensors with built-in validation rules, processing over 100,000 daily telemetry readings for Power BI visualisations.
- Coordinated real-time sensor integration across remote agricultural stations using cloud-based asynchronous workflows and virtual monitoring protocols.
- Developed neural weather-forecasting models with Neural GCM to deliver actionable micro-climate insights for local farming communities.
- Engineered automated anomaly-detection mechanisms within live-streaming pipelines to preserve continuous sensor data integrity.
- Executed data governance procedures to standardise environmental metrics across disparate IoT networks.

Design Thinking Innovator (Hybrid) | SUGAR Network for Design Innovation | Potsdam, Germany | Dec 2024 – June 2025

Key Responsibilities:

- Orchestrated 12 cross-functional design thinking workshops across international teams, aligning business objectives and technical roadmaps with a 91% stakeholder agreement score.

- Managed distributed project operations across European and African time zones using cloud-ready virtual collaboration suites and asynchronous feedback loops.
- Accelerated regional institutional integration into the global SUGAR network, expanding international collaborative research opportunities by 42%.
- Translated complex enterprise data requirements into actionable technical task backlogs for engineering units.
- Established robust data governance and privacy evaluation protocols to ensure international compliance across all solution prototypes.

Data Science Research Scholar | iLab Africa, Strathmore University | Nairobi, Kenya | May 2023 – June 2025

Key Responsibilities:

- Built real-time streaming ETL/ELT pipelines using Apache Kafka, Spark, and SQL on GCP and Azure, reducing anomaly-detection latency to under 5 minutes for healthcare datasets.
- Applied ARIMA, XGBoost, and Prophet time-series models to forecast revenue and customer behaviour, boosting financial planning accuracy by 15%.
- Optimised inventory reorder point prediction pipelines using ML regression and mathematical optimisation, reducing hospital overstocking and holding costs by 20%.
- Supported cross-institutional research projects by deploying cloud-native Docker containers and Git CI/CD pipelines for seamless asynchronous remote collaboration.
- Visualised high-impact health analytics through a custom Power BI dashboard presented at the official Kenya–EU Economic Partnership Agreement forum.
- Executed natural language processing pipelines using BERT, spaCy, and NLTK to perform sentiment and thematic analysis on thousands of hospital review records.

Other Experiences

- **Digital Support Associate** | Kenya Methodist University | Meru, Kenya | Sep 2019 – Nov 2022
- **Data Analyst Intern** | Meru County Government | Meru, Kenya | May 2022 – Oct 2022
- **Data Science Research Assistant** | CNEAT Research Academy | Meru, Kenya | Oct 2020 – Apr 2022

Tools

Python, SQL, HTML, CSS, Git, Jupyter, Docker, TensorFlow, PyTorch, Scikit-learn, Keras, XGBoost, ARIMA, Prophet, spaCy, NLTK, BERT, Pandas, GeoPandas, Folium, Apache Kafka, Apache Spark, SSIS, MS SQL Server, Google BigQuery, Azure SQL, Power BI, Tableau, Matplotlib, Seaborn, Plotly, MLflow, dbt, Apache Airflow, Snowflake, AWS SageMaker.

Languages

- English – Proficient
- Swahili – Native
